

ELECTRONICS/MECHANICAL TECHNICIAN

Connecticut's Raptor Scientific location is looking for persons who understand electronics, electrical wiring, mechanics, computer set-up (networks, communications, software installs, driver updates); in other words, geeks who are not afraid to get their hands dirty.

The day-to-day work entails:

- Planning your work, procuring parts, kitting, organizing
- Electrical and electronic assembly and wiring
- Configuration and programming of hardware interface devices
- Mechanical assembly of instruments and machines
- Performing systems troubleshooting and checkout
- Installing the systems at customer locations, both domestic and international. typical installations are less than one week.
- Communicating with customers for problem resolution

Some physical effort (lifting and kneeling) is required to build, install, and service the product although cranes and other apparatus are available to assist.

EXPERIENCE & SKILLS

Positions for various levels of technical ability are open. All candidates who pass the initial criteria will be given an aptitude test with a focus on electronics to help determine their prospective placement.

- Required
 - 3 years of electronics skill-set, theory and practical application
 - Ability to wire from schematics
- Preferred
 - Computer configuration and set-up experience
 - Intermediate mechanical assembly skills

Competitive salary is commensurate with qualifications and experience.

BENEFITS

- 80/20 healthcare, dental, and vision
- 401K with company matching.
- ancillary disability, voluntary life, and accident insurances available a la carte
- wellness initiatives
- revenue bonus plan
- education assistance plan

This position requires use of information which is subject to the International Traffic in Arms Regulations (ITAR). All applicants must be U.S. persons within the ITAR definition of; "A U.S. person as a U.S. Citizen, U.S. Permanent Resident (i.e. 'Green Card Holder'), Political Asylee, or Refugee."
