

QUALITY CONTROL / ASSURANCE TECHNICIAN

Raptor Scientific, a Connecticut-based aerospace test system manufacturer has a full-time position for a Quality Technician. We are seeking a person skilled in quality process, procedures, and execution in machinery manufacturing. This opportunity is for those who want wide-ranging responsibilities.

QUALITY CONTROL

- Incoming: **Inspect raw materials and machined parts** for dimensional compliance and defects.
- In-process: **Inspection and certification of calibration weights and measures. Inspection of electro-mechanical subassemblies** and mid-process checkpoints for complex machinery and instrumentation products.
- Final inspections: **Verification of instrumentation performance** including mechanical, electrical, software, and end-user experience.

QUALITY ASSURANCE

- Develop, document, organize, and edit **production processes and procedures.**
- Assist in maintaining existing, and in **standing up new quality standards and compliance programs.**

EXPERIENCE & SKILLS

Required:

- Minimum of **3 years working in quality control** in a manufacturing environment with an understanding of how quality control, quality assurance, and quality engineering all fit and function together.
- **Proficiency in Microsoft Windows applications such as Excel and Word**
- Strong **proficiency with common mechanical gaging, measurement, and inspection tools.**
- Experience with the processes required to certify measurements traceable to NIST.
- Experience with **final electrical and mechanical assembly inspection.**

Preferred:

- Experience working within industry standard quality systems such as ISO9001, ISO17025, and AS9100
- Strong mathematics background with good problem solving and analytical skills.
- Familiarity with electronic test-equipment use, and testing methods.

BENEFITS

- 80/20 healthcare, dental, and vision
- 401K with company matching.
- ancillary disability, voluntary life, and accident insurances available a la carte
- wellness initiatives
- revenue bonus plan
- education assistance plan

This position requires use of information which is subject to the International Traffic in Arms Regulations (ITAR). All applicants must be U.S. persons within the ITAR definition of; "A U.S. person as a U.S. Citizen, U.S. Permanent Resident (i.e. 'Green Card Holder'), Political Asylee, or Refugee."
