Air Data Calibration Services

Our Primary Pressure Standards have a with very low measurement uncertainty and covers the pressure range of 1 to 380 kPa (0.3 to 120 inHg) in absolute and gauge modes with fully automated operation and state of the art uncertainty. Raptor Scientific offers calibration services for a variety of Air Data test equipment. Calibrations can be performed on pitot static test sets, calibrators, air data computers, transducers, gauges and and other air data related instrumentation.
